

JESUS RODRIGUEZ

jrodriguez44@gmail.com · [LinkedIn](#) · [Personal Website](#) · Galveston, TX

EDUCATION

University of Texas-Medical Branch (UTMB)
MS, Biostatistics

Expected Graduation Date-Dec 2027
Galveston, TX

University of Nebraska-Lincoln (UNL)
BS, Statistics and Data Analytics
Minor, Mathematics

Aug 2021-Dec 2025
Lincoln, NE

RELEVANT EXPERIENCE

University of Southern California
Biostatistical Intern

(2 mth) June 2026-July 2026
Los Angeles, CA

- Performed a landmark analysis with competing risks on subsetted United Network for Organ Sharing data on heart transplant candidates
- Applied cause-specific Cox, Fine-Gray, and direct binomial regression models to analyze competing risks, showing that candidates with urgent priority escalation had lower mortality and higher transplantation rates

UNL Department of Statistics
Teaching Assistant

(5 mth) Aug 2025-Dec 2025
Lincoln, NE

• Intro to Mathematical Statistics I - Distribution Theory:

- Led weekly recitation sessions to reinforce lecture material and guide students through complex statistical problems
- Held office hours to provide individualized support, answer student questions, and clarify challenging concepts

The Global Career Accelerator
Data Analyst and Coding for Data Intern

(1 yr) Jan 2025-Dec 2025
Remote

• Fall 2025 (SQL and Python):

- Conducted data analysis using SQL and Python to extract, filter, and manipulate large datasets
- Collaborated with a cross-functional, global team to complete analysis tasks

• Spring 2025 (Excel and Tableau):

- Analyzed A/B tests to measure understanding of trends and audience behavior for The Recording Academy in Excel using pivot tables and logical functions such as Xlookup; demonstrated that a website split improved engagement
- Told a story with data by generating visualizations for Intel's Sustainability team in Tableau utilizing charts and dashboards

University of Texas-Medical Branch (UTMB)
Biostatistics and Data Science Summer Intern

(2 mth) June 2025-July 2025
Galveston, TX

- Cooperated with biostatisticians, principal investigators, and doctoral researchers to examine clinical burn patient data from [TriNetX](#) to better treat burn survivors; ultimately ran a chi-square analysis in R to find an association between patient age and burn size for certain outcomes
- Coded a folder scraping function to extract prevalence test results from over 22,000 CSV files downloaded from TriNetX and manipulated the results for a proper analysis
- Presented research analysis findings, translating statistical tables and charts into clear, actionable insights for both technical and non-technical audiences

OTHER WORK EXPERIENCE

York Animal Clinic
Veterinary Assistant

(7 yr 7 mth) May 2018-Dec 2025
York, NE

- Communicate and partner effectively with veterinarians and veterinary technicians to guarantee thorough understanding of patients' needs
- Adapt quickly to changing priorities, work efficiently under pressure, and collaborate with team members to provide ample care and compassion to both patients and clients
- Support veterinarians during house calls by organizing equipment and managing livestock handling to prevent incidents, allowing the veterinarian to focus fully on patient care and ensuring visits run smoothly

SKILLS

Technical - Statistical modeling (linear/logistic regression, ANOVA), power analysis, data management (dplyr, pandas), data visualization (ggplot2, matplotlib), reproducible reporting (Quarto, R Markdown), version control (Git/GitHub), database querying (SQL), webscraping (rvest, APIs, JSON to tabular transformation, PDF data extraction), functional programming (purrr)

Languages and Tools - *expert:* R *proficient:* SAS, Excel, Tableau, Quarto *intermediate:* SQL, Python, Git/Github *beginner:* Shiny

CONSULTANT TRAINING & EXPERIENCE

Statistical Cross-disciplinary Collaboration & Consulting Lab

(10 mth) Aug 2024-May 2025

R and SAS Trainee and Assistant Consultant

Lincoln, NE

- **Spring 2025 (R and SAS Workshop):**

- Participated in a statistical analysis workshop using R and SAS, applying hypothesis testing methods such as t-tests and ANOVA, as well as data wrangling and visualization techniques to datasets
- Completed guided exercises analyzing datasets with R and SAS, reinforcing statistical concepts and data visualization

- **Fall 2024 (Consultant Collaboration):**

- Supported two graduate consultants on a client-focused mock experiment on crop survival under drought conditions, assisting with data analysis in SAS and contributing to report writing and presentation development
- Scheduled and engaged in client meetings to align progress and goals, while leveraging mentorship from experienced consultants to strengthen project outcomes

SELECTED DATA ANALYSIS PROJECTS

Competing Risks Analysis on Heart Transplant Data

July 2026

- **Competing Risks Survival Analysis with Landmark Methods in R**

- Modeled death and transplant outcomes among stable vs. escalated heart transplant candidates
- Communicated [findings](#) and differences of each models interpretability to nontechnical audiences through clear explanations and polished visualizations and tables

ClinicalTrials.gov Cluster Headache Visualization

November 2025

- **List Processing, Data Visualization, and Shiny App Development in R**

- Retrieved and parsed clinical trial data using the [ClinicalTrials.gov API](#)
- Transformed JSON responses into tidy, analysis ready data frames

A Real World Evaluation of Chronic Outcomes by Burn Size and Age

July 2025

- **Analysis in R and Poster Presentation:**

- Analyzed 22,000 CSV files from TriNetX, containing results from an outcome-prevalence test
- Wrangled raw data into neatly organized and presentable tables
- Showcased findings to other biostatisticians, principal investigators, and medical students

(Over)Analysis of Imminent Sharknados

May 2025

- **Analysis in R, Research Report, Presentation:**

- Scraped tornado weather data, shark population data, as well as spatial coastal data from online sources to determine how likely a “sharknado” would occur
- Recorded methods and results in Quarto to document findings, visualizations, and assumptions
- Composed a [presentation](#) to address conclusions of the analysis

NOTABLE COURSEWORK

Statistical Methods & Design

- **Principles of Statistical Analysis** - Applied statistical inference, hypothesis testing, and model assessment in datasets
- **Principles of Statistical Design I & II** - Evaluated experimental studies using randomized, block, and factorial designs
- **Statistical Modeling I & II** - Built and interpreted generalized linear models, mixed models, and multivariate techniques for complex data
- **Regression Analysis** - Modeled relationships between variables using linear, multiple, and logistic regression techniques

Statistical Computing & Professional Skills

- **Statistical Computing in R and Python I, II, & III** - Developed programming skills for data cleaning, visualization, and webscraping using R and Python
- **Analysis of Messy Data** - Applied modern statistical methods to handle missing data, outliers, and multivariate techniques for complex data
- **Technical Statistician Skills** - Strengthened professional skills in data communications, teamwork, reproducible research, and technical writing
- **Statistical Collaboration** - Sharpened skills needed to consult effectively as a statistician
